

Travel Case for the Elecraft KX3 Transceiver  
Phil – AD5X

For a compact travel case for the KX3, check out the Harbor Freight 69316. This is a 11.25x7.5x4.5" padded, aluminum carrying case. Current price is \$16, plus there are often on-line coupons you can print and use in your local store. I bought two of these cases. One holds my KX3, Begali Traveller Light and microphone. I bought some foam from my local Hobby Lobby to keep everything nicely supported. My second case holds my power supply (Gamma HPS-1a), 40-10 meter portable dipole ([www.ad5x.com/images/Articles/Dipole%20RevA.pdf](http://www.ad5x.com/images/Articles/Dipole%20RevA.pdf)), logbook, writing pad, headphones and assorted cables and adapters. See the photos below.

KX3, Begali Traveller Lite, Mic & DC cord

Power Supply, Antenna, Headphones, Logbook, Feedline, Adapters, etc.
